

Cutting with Scissors

Proper way to hold scissors

- The middle finger and thumb are placed in handles only as far as the first joint.
- The pointer finger is held against the handle shaft, and the ring and pinky fingers curve inward toward palm.
- Always have scissors pointing up and other hand holding paper.
- Have scissors take small bites. Do not fully close your scissors. If you take little bites your scissors will hold your paper for you. If you fully close your scissors you will lose your paper.
- To change directions always keep scissors pointing up, move paper not scissors.
